The episode and its boundaries

Stake profile STAKE-IN concerns India on 3 November 2026. Karthikeyan Sengupta recorded CASH-STAKE, WELCOME-STAKE, APP-STAKE-A and APP-STAKE-I separately. The cash ledger uses the author's own funds without an active welcome bonus. The welcome is an independent episode with its own account and first qualifying deposit. Its balance is not added to the cash ledger.

The Android route is an operator web app/PWA, not an APK. The 5 USDT minimum belongs to this selected cashier. The guide dated 20 March 2025 says there is no general deposit minimum; that statement is distinct from wallet-specific limits. The guide records a 1 USDT withdrawal fee and 2.5 USDT minimum. TRC20 is the network of this cash episode.

Registration, recovery and identity

The account was created using email and password. Mandatory conditions were age 18+, country India, currency USDT and acceptance of the terms. The promo-code field was left empty and optional marketing consents were disabled. Registration used email confirmation. No documents were requested at registration. No documents were requested at the first deposit, first withdrawal or repeat withdrawal in this episode. Withdrawal confirmation used a link in the confirmed email. Email or phone confirmation is distinct from identity verification. Recovery through the login form used a ten-minute code; changing the password ended other sessions.

Deposit DEP-STAKE

The author opened Wallet → Deposit → USDT (TRC20) and created a fresh request for 12.50 USDT. Both the gaming account and payment account were in India, and the payment owner matched the account owner. The request lasted 15 minutes. UPI uses an intent with a fresh payment reference; card payments use bank confirmation; the USDT route uses TRC20 and 20 confirmations. Those method-specific actions are separate.

Withdrawal WD-STAKE

The ordinary-deposit turnover requirement was 1×: five stakes of 2.50 USDT produced 12.50 USDT. No round remained unsettled and no welcome was active in CASH-STAKE. The requested amount was 8.00 USDT; the game wallet was debited by that amount, with the fee contained inside the request rather than debited again.

Support SUP-STAKE

The en-IN Live Chat enquiry concerned the difference between game Cashout and external withdrawal. It was sent at 03.11.2026 10:18:20 IST. The automatic reply arrived after 2 seconds; the first substantive answer after 62 seconds; the conversation ended 242 seconds after submission. The agent explained that round winnings enter the game balance, while an external withdrawal uses the separate cashier. The financial adjustment was 0 USDT. There was no move to Telegram and no external complaint in this episode. A separate hi-IN enquiry received a written reply. The profile channel hours were 24/7.
