Bonus operation and ordering

The English terms take precedence in a dispute. Bonuses are sticky: activation links the real balance to the bonus, withdrawals are blocked while it is active and the active bonus cannot be cancelled. Wagering must be completed before expiry, with the offer determining the number of required turnovers. The general duration is 14 days after credit; activation must occur within 24 hours. If an activated casino bonus remains unwagered at the end of that period, its balance and associated stakes/winnings are removed. An expired bonus can permit withdrawal when funds have been wagered at least once under the stated AML condition.

Only one bonus/free-spin reward may be active at a time. Rewards are wagered independently in activation-date order, cannot be stacked, and may be declined. Previously unused bonuses cannot be activated after a withdrawal request and are cancelled by withdrawal. One offer is permitted per person, family, address, email, IP, phone, current account, credit/debit card, e-wallet/payment account or device.

Stakes, balances and caps

The general active-casino-bonus maximum stake is €5 unless the offer says otherwise. The separate contribution clause gives €15 from real balance and €5 from bonus balance. Real funds are used first, then bonus funds; the general clause credits stakes/winnings to the bonus balance. Deposit activation attaches real funds until wagering or expiry. Do not play a qualifying deposit before activating its bonus: related winnings may be forfeited. Welcome-bonus winnings are capped at €250. A freebet must be played in full.

Free spins are not automatically cancelled except on expiry; cancellation requests go to support. An active bonus balance of €0.09 or less is cancelled, using a third-party exchange rate for other currencies. Spribe mini-game free-spin stake amounts are excluded from winnings. Play using an active bonus or bonus balance does not count for daily missions and trophies.

Shop rewards

Bytes can buy bonus money or free spins in the shop, subject to the general terms. The purchased-bonus-money rule separately credits winnings to the balance that funded the stake: real winnings to real balance and bonus winnings to bonus balance. Its maximum counted stakes are €15 real and €5 bonus; activation is within 24 hours, expiry after ten days and wagering is 1x the bonus. Purchased free-spin winnings have a €250 maximum. These specific provisions remain separate from the general bonus rules.

Deposit promotion conditions

A qualifying deposit applies to one promotion and cannot combine offers or successive deposits. The example requires €20 for ten Aviator spins and €20 for twenty Book of Dead spins; one €20 deposit cannot obtain both. The same no-stacking rule includes VIP promotions. The player must contact support by email or live chat four hours after deposit, as worded in the source. Telegram offers are once per player and may be denied under the one-person/household rule. Weekend offers run from launch to Sunday 23:59. The deposit must follow the email or Telegram promotion message.

German, Austrian, Finnish and Brazilian players are excluded from the sports welcome freebet. The casino welcome advertises up to 100 Shaolin Panda free spins on the first deposit without wagering. The separate sports welcome advertises 50% of the first deposit as a freebet. Neither banner establishes eligibility of the original Tower Rush. Telegram/community offers are advertised weekly.

Prohibited conduct and stated sanctions

Using a strategy to meet wagering, delaying rounds/free spins/bonuses until wagering obligations disappear, or making fresh deposits while in-game rewards remain can lead to cancellation of winnings. Unfair acquisition or breach can lead to cancelled bonuses/winnings and confiscated account funds. Minimal-risk betting may trigger immediate bonus deactivation. The terms prohibit bonus hunting and collecting rewards for later play designed to secure positive expected value; stated sanctions include removing winnings and bonus balance.

A freebet cannot oppose a real-money position, such as a real-money team win paired with a freebet draw. Both bets and the freebet are cancelled. The casino reserves changes to terms without prior notice and disclaims responsibility for wrong or incomplete affiliate offers, including missing wagering information.

A repeated pattern of depositing mainly for promotions and staking only that deposit and its proceeds may restrict future promotions, deactivate active bonuses and remove loyalty points; the original deposit is retained. That restriction can be reviewed after sustained regular, varied play. A separate confirmed-abuse rule includes low-odds sports bets, arbitrage, opposing outcomes, minimum-multiplier mini-game cashouts and near-symmetric live-casino hedging. It permits cancellation of bonus and related winnings, re-wagering of the original deposit before withdrawal and loss of future eligibility; a confirmed abuse decision is final. Both sanction groups may extend to the player’s accounts on partner brands under the same licence.

Wheel of Legends

The never-funded and funded wheel profiles, all reward probabilities, free-spin values and both currency-cap formulations are reproduced in E09-casinos_betify-observations.pdf. The general clause lists release caps of 50 EUR / 75 CAD / 54 USD / R$312 / 600 NOK / 215 PLN, then describes a post-wager maximum of 50 EUR / CAD / USD; the 75-spin award has a €100 exception. The source numbers its wheel clause 39 and also numbers the purchased-spin €250 cap 39; they are distinct conditions.

Cashback and VIP

The programme advertises automatic weekly cashback, available from the start, up to 20% with no amount cap. Claim it after logging in every Monday, through the menu or cashback page. It can be played or withdrawn under the same conditions as a deposit. VIP cashback is described as a percentage of the preceding week's net losses. Rank depends on wagering, with higher withdrawal limits, exclusive offers, a personal manager and 24/7 VIP live chat. "Unlimited rewards" is promotional wording, not a replacement for particular withdrawal and bonus limits. The complete level/cashback mapping is in E09-casinos_betify-observations.pdf.

Recorded VIP Bytes and stake sequence

The sequence below retains successive Bytes and total-stake values together where the source supplies that pairing; it does not invent a missing level identifier. The separately verified level table remains the authority for level-to-cashback associations.

3,000,000	1,000,000,000

Tournament and recent-result observations

The recorded interface has recent, archived, current and future races. Galaxsys Challenge shows a €0.2 minimum, a six-day label, and the separately recorded UTC dates. Upcoming Toucan Royale, Mining and Pirate Challenge dates and the first ten leaderboard rows appear in E09-casinos_betify-observations.pdf. Additional catalogue counts shown here are 186 games, 144 games and 17 games; the promotion area also displays 43. They belong to their screen states, not one combined game count.

The following remaining observation tokens retain their sequence and punctuation. A flat token sequence does not establish all missing links between time, stake, player, multiplier and win; no such links are reconstructed here.
