Source corpus: stored information and source areas 53
Tower Rush — provider and independent materials 53

03. Computer and synchronization

Attribute	Meaning, conditions and result
Availability of a desktop client	For the most Tower Rush A separate desktop client is not used; the game is loaded as HTML5.
Desktop access format	Windows: the Brave/Chrome browser. 1w's statements about the Windows application do not mean the EXE of the game.
Bit depth and customer requirements	For the selected browser — Windows 11 x64; HTML5 does not require the installation of a binary file Tower Rush.
Window size	1440×900 CSS px.
Browser Scale	100%; a separate 200% check preserved the main elements, the tables received local scrolling.
Menu display	I opened the catalog, Search, Providers and Wallet from the main menu.
Game Search	Request Tower Rush → the Galaxsys card → checking for the absence of the suffix 2.
Number of actions before the game	3 actions: search, card, mode selection.
Number of actions before the checkout	2 actions: Wallet → Deposit/Withdraw.
Horizontal scrolling	The game does not have horizontal scrolling; a wide history table scrolls inside its own block.
Readability of the amount	I have distinguished the rate, gross, net, FUN, and the currency of the money account; the withdrawal fee is shown separately.
Keyboard navigation	Tab goes through the menu and buttons; Space/Enter sends the action only when focused. The keyboard does not create an auto-series.
Behavior of the modal window	I opened the rules, closed them with a cross, and returned to the same round; the modal window did not cancel the bet.
Saving the input	After closing the tab, the session was saved until exiting; the password and wallet status are not stored as the client's game balance.
Balance on the second device	I opened one account on the second device: after the calculation, the same balance appeared, there was no transfer between devices.
Betting history on the second device	I matched the local key of the round and the amount; re-reading the history did not create a second credit.

Attribute	Meaning, conditions and result
Bonus progress on the second device	After updating the page, the welcome progress matched the server record.; Tower Rush with a 0% deposit, I did not increase it.
Output on one device	The local Logout closed the current session; the command to end all sessions was applied separately.
Interface error	I reproduced the overlap of the amount field with the on-screen keyboard; after closing it, Build became available, and the bid was not debited until confirmation.

04. Mobile applications

Attribute	Meaning, conditions and result
Platform	Android, iOS, and Windows are represented by separate entries APP-...-A, APP-...-I, and ENV-D.
Receiving channel	APK is the application button in the operator's interface; iOS is the operator's website in Opera; the access format is a web container, a separate IPA of the game is not used.
Publisher's name	The container belongs to the corresponding operator profile; the game belongs to Galaxsys. Opera is a separate browser container.
Application version	The versions of each Android profile are listed in the operator's cards; Crorebet 3.6 is saved from the application page.
Assembly Number	The local version of the APP profiles is... from 03.11.2026; the external build number refers to the corresponding binary distribution.
Package ID	The card IDs are APP-1WIN-A...APP-BETCLIC-I; the external package ID is the identifier of a specific binary distribution.
File size in bytes	APP-1WIN-A: 36700,000 bytes; other APKs are separate sizes in cards.
File size in MB	APP-1WIN-A: 36.70 MB; MB=1,000,000 bytes.
File size in MiB	APP-1WIN-A: 34.9998 MiB; MiB=1,048,576 bytes.
Size after installation	APP-1WIN-A: 78.91 MB; includes unpacked resources.
Amount of data after the session	APP-1WIN-A: 22.00 MB of data after 30 minutes; the remaining values belong to their episodes.
Minimum OS	Android 10+ profile; Crorebet separately saves the Android 5.0 requirement from the card; selected Android 15 device.
Architecture	Android arm64-v8a; iPhone arm64; desktop x64.
Checksum	The cryptographic checksum is an attribute of the corresponding binary distribution and is assigned to its version.
Update	I updated through the previous channel, re-logged in, saved my account and history; no new balance was created.
Requested permission	Camera for KYC; notifications for messages; geolocation separately, without requiring access for the sake of launching the game.

Attribute	Meaning, conditions and result
The action that triggers the request	The camera was requested when going to shoot the document; notifications were requested after a separate consent.
Failure behavior	The camera failure stopped the file download; the notification failure did not close the checkout and the game.
Push	After the authorization, a notification about the completion of the application appeared in the Android profile; in the iOS web route, the wallet history remained the main channel.
Biometric login	The OS biometrics confirmed access to the saved password; it does not replace the operator's KYC.
Offline behavior	Without the network, I opened the shell, but did not send new bets; after recovery, I read the history of the accepted round.
Session traffic	The initial download is 7.20 MB; the re-exchange is 0.84 MB; the 30-minute stream is specified separately for each application.
Charge consumption	Each card contains percentage points for 30 minutes at 50% brightness and Wi—Fi; this is not a percentage of battery wear.
Heating	The case is moderately warm to the touch; the characteristic is recorded by tactile assessment, the temperature in °C refers to instrumental measurement.
iOS WebView Container	Opera for iPhone on iOS 26.5; the operator's website runs inside a WebKit container, its own native client Tower Rush No.
APK installation Result	I have separated the appearance of the icon after installation and the interactive readiness of the game; the times are contained in the cards.
targetSDK	targetSdk belongs to the manifest of a specific APK and defines the target version of the platform.
compileSDK	compileSdk is a parameter for building a specific file that is considered separately from the Android phone version.
Required hardware features	required hardware features are specified in the binary file manifest; required=true indicates that the corresponding hardware feature is required, including the camera when it is specified in this list.
Attribute	Meaning, conditions and result
Manifest Flags	allowBackup, usesCleartextTraffic, supportsRtl, extractNativeLibs, application.name they belong to a

Attribute	Meaning, conditions and result
	specific manifest and describe the parameters of the corresponding application.
The actual permission request	I separated the camera request, consent, and use of the snapshot; there was no shooting event when the request was refused.
The result of the denial of permission	For KYC, I chose a file instead of a camera; functions without permission were not declared broken.
WebView Container Application version	Opera iOS 6.8.1 is the version of the container application; iOS 26.5 and the site version 03.11.2026 are recorded separately.

T04. Availability of mobile products

Attribute	Meaning, conditions and result
Availability of an Android app	The Android APK is described in nine operator profiles; the Stake is saved as a web application/PWA. The approved profiles relate to the specified applications and receiving channels.
Availability of an iOS app	The iOS web route is described for all ten brands; the App Store source statements are stored in their areas. The WebView and website shortcut are not equivalent to a native game.

05. Speed and stability

Attribute	Meaning, conditions and result
Measurable action	Launching directly Tower Rush up to an affordable bid; separate launch of the lobby and the ticket office.
The beginning of the interval	Clicking the card Tower Rush.
End of the interval	The appearance of an active Build and an available bid field, rather than a download logo.
Application Status	The cold and re-launches have separate series.
Cache status	Cold: cleared site data; repeat: saved cache.
Series Network	Airtel Wi-Fi, ENV-A or ENV-I; 5G is not included in the average of these series.
Number of launches	5 attempts × 4 series × 10 statements = 200 attempts. Separate network incidents are described outside the series.
The result of the first launch	APP-1WIN-A, the first cold: 5.87 p .
The result of the next run	Each replay is recorded separately in a series of operator cards.
Average	APP-1WIN-A cold: 4.414 p .
The median	APP-1WIN-A cold: 4,830 p .
Minimum	APP-1WIN-A cold: 2.750 pages .
Maximum	APP-1WIN-A cold: 5,870 p .
Number of errors	0 out of 200 attempts of the main matrix; network incidents have a separate denominator.
Number of successful launches	200 out of 200 basic attempts; this is the result of a profile, not a guarantee of any connection.
Type of error	INC-NET: After sending the Build, the animation froze; server acceptance was checked through the history after the network was returned.
Recovery after network failure	I restored TR-D-10: one debit 10 FUN, one credit 15 FUN. I did not send a new bid request.
Comparability of series	One version is being compared Tower Rush, the same type of startup, ENV, cache, and network; money and FUN are not combined in monetary statistics.

06. Payment availability

Attribute	Meaning, conditions and result
Method name	UPI in INR; Visa debit in USD/EUR; USDT (TRC20) in a separate crypto episode.
Product Type	UPI — transfer; Visa — card; USDT — token, TRC20 — network; MetaMask and exchanges — a separate access layer.
Country of residence	India.
Billing account country	India; the bank account belongs to the episode participant.
The country of the game account	India in operator profiles.
Country of the bank or issuer	Indian issuer for UPI/cards; the crypto wallet does not have an issuing bank.
Availability of registration in the payment service	The right to open a wallet by itself does not mean that it is accepted by the casino's cashier.
The availability of the deposit from the operator	A separate list has been selected for each direction; only a specific DEP route is executed in the log....
Availability of output from the operator	The conclusions of WD-... are described separately; the presence of the method among deposits does not transfer it to withdrawals.
Wallet currency	INR is the first displayed equivalent; the monetary unit of the actual wallet is indicated in each transaction.
The currency of the cash limit	INR for the Indian route, USD/EUR for currency, USDT for crypto; restrictions are not compared without the exchange rate.
Departure currency	DEP-...: matches the currency of the transaction in the summary.
Receiving currency	Transfer in the same currency, exchange rate 1:1; the INR equivalent is not charged additionally.
Wallet identification level	The identification of the payment owner is separate from the casino's KYC; in the money episodes, the names matched.
Bank restriction	Only your own account specified in the application has been accepted; someone else's account is not being used.
Card type restriction	In card episodes, debit Visa is used; credit and prepaid products are not equated to it.

Attribute	Meaning, conditions and result
The availability of the method without a bonus	The money episodes were completed without an active welcome.
Admission of the method to the promotion	The welcome qualification has its own deposit and an authorized method; registration currencies are not payment methods.

T06. Currencies and assets

Attribute	Meaning, conditions and result
Supported fiat currency of the gaming account and cash register	For each operator, there is a separate line for the currency below, INR first; the display of the equivalent, balance and calculation of the operation are different.
Supported crypto asset of the gaming account and cash register	BTC, ETH, USDT (TRC20/ERC20) and selected additional assets are listed separately; network operations are linked to a specific coin and network.

07. Replenishment

Attribute	Meaning, conditions and result
The point of entry to the cashier	Wallet → Deposit.
The name of the method in yandex. checkout	UPI (INR), Visa debit (USD/EUR), USDT (TRC20); exact reference in DEP-....
Application amount	The amounts of DEP-... are shown in the summary and log; base DEP-1WIN 400 INR.
Minimum operation	1Win 400 INR; Stake 5 USDT for the selected wallet; MyStake 20 USD; 1XBET 250 INR; 4RABET 350 INR; Melbet 300 INR; Parimatch 450 INR; Crorebet UPI 100 INR; Betify 20 EUR; Betclic 600 INR.
Maximum operations	UPI profile 100,000 INR per application; Visa 2,000 USD/EUR; USDT 2,000 USDT.
A new application is needed	I created a new application before each new transfer; I did not reuse the expired one.
Type of banking details	UPI intent with assignment; card confirmation; cryptoaddress of the selected network.
The validity period of the application	15 minutes from the creation of the application.
Destination ID	Local DEP-... — reporting episode keys, non-bank UTR or blockchain-TXID.
Owner's name	The payer is the account owner; personal details are not disclosed in the public database.
Bank confirmation	UPI-PIN/bank confirmation is performed in the banking interface; the casino password does not replace it.
Minimum receipts after deductions	There is no replenishment fee in the episodes: the minimum of admission coincides with the minimum of the application.
Number of network confirmations	USDT/TRC20: 20 confirmations in the crypto episode; UPI/card has no blockchain confirmations.
Status before transfer	The application has been created, the transfer and the loan have not been received yet.
Status after transfer	Confirmation has been received, and one amount has been credited to the wallet.
The amount that appeared on the balance sheet	The credited amount of each DEP is equal to the amount sent; the card tables are the main monetary register.
Automatic activation of the bonus	In CASH-... welcome is disabled; in WELCOME-... there is a separate selected activation scheme.

Attribute	Meaning, conditions and result
Resending if there is a delay	I checked the history of the existing application; I did not send a repeat transfer until I found out.
Replenishment episode ID	DEP-1WIN, DEP-STAKE, DEP-MYSTAKE, DEP-1XBET, DEP-4RABET, DEP-MELBET, DEP-PARIMATCH, DEP-CROREBET, DEP-BETIFY, DEP-BETCLIC.
The country of the game account replenishment	India.
Country of the replenishment billing account	India.
The currency of sending the deposit	The currency of the operator's summary; USDT has not been renamed to USD.
The currency of the deposit	The same currency; there is no separate conversion credit.
Time when the deposit was sent	The exact date/time of IST is indicated on the operator's card for each DEP.
The time of depositing the deposit	The date/time of the transfer is calculated as sending plus an individual interval; it is given for each DEP.

08. Commissions and conversions

Attribute	Meaning, conditions and result
Operator's commission	0% replenishment; 4RABET/Betclic withdrawals 0.5% of the application; Stake is fixed at 1 USDT; the remaining selected withdrawals are 0.
Payment service commission	In the selected UPI/card episodes, the external fee is 0; it is not replaced by the casino commission.
Network commission	In WD-STAKE, a fixed fee of 1 USDT is counted once within the application; there is no separate second fee.
Bank commission	0 in the described direct routes.
Fixed part of the tariff	WD-STAKE 1 USDT.
Percentage part of the tariff	WD-4RABET/WD-BETCLIC: 0.5% of the bid amount.
Minimum commission	0 in the percentage route model; fixed crypto commission of 1 USDT.
Maximum commission	The interest rate without a separate cap is within the application limit; the fixed fee does not increase with the amount.
Debit method	From the withdrawal request; balance reduced by W, receipt of W−fee.
Commission currency	Matches the withdrawal currency.
Yandex.Checkout's course	1 unit of dispatch = 1 unit of transfer, since there is no conversion operation.
The moment of fixing the course	Application creation; a separate INR display rate does not apply to the money magazine.
Amount after the commission	The W−fee was obtained from the table of each WD.
The recipient's total	The recipient's total matches the Received column; the commission is not charged again from above.
The owner of the commission	The percentage commission is the operator; the fixed crypto commission is the published withdrawal fee through the cashier; there is no additional bank in USDT.
The amount of the external fee	0 in excess of the calculated commission for selected episodes.
The method of debiting the external fee	There is no separate on_top collection in these logs.
The full amount received after the commissions	WD-STAKE: 8−1=7 USDT; WD-4RABET: 350−1,75=348,25 INR; WD-BETCLIC: 600−3=597 INR.

09. Cryptomarketing

Attribute	Meaning, conditions and result
Active	USDT, separate from USD.
Network	TRC20 in the Stake crypto episode.
The way of movement	External transfer from your own wallet; not an intra-exchange Pay ID.
Address or Pay ID	The address is selected in the wallet on the TRC20 network; the real address is not published in the document.
Need a memo/tag	Memo/tag is not used in this TRC20 route.
Recipient's network support	The destination is selected on the same TRC20 network; the similarly named ERC20 is not considered a compatible address route.
Number of confirmations	20 for the selected deposit.
The moment of sending to the network	Sending DEP-STAKE and WD-STAKE has its own time line of the card.
TXID	The public TXID is the identifier of the corresponding blockchain transaction; its status is recorded in the transaction log.
ID of the internal transfer	DEP-STAKE / WD-STAKE are local keys, not public network identifiers.
The amount after the network fee	WD-STAKE: 7 USDT after 1 USDT collection of 8 USDT from the application.
Operator's status	Credited for DEP; sent and completed for WD.
Payment transfer status	The final receipt is 7 USDT; waiting for confirmations is separate from checking the casino.
Refund for unsupported network	I stopped sending to an incompatible network before confirmation; this error will not be returned automatically.

10. Withdrawal

Attribute	Meaning, conditions and result
The direction of the operation	External withdrawal, separate from the game Cashout.
Output method	The method of each WD corresponds to the card: UPI, Visa debit or USDT/TRC20.
Minimum output	Crorebet UPI 500 INR; Stake 2.5 USDT; MyStake 10 USD; Betify 10 EUR; the remaining INR is the minimum of the selected card.
Maximum requests	100,000 INR or 2,000 USD/EUR/USDT per application in the settlement profile.
Daily limit	150,000 INR or 5,000 USD/EUR/USDT per calendar day IST.
Weekly limit	500,000 INR or 15,000 currency units for 7 calendar days.
Monthly limit	1,500,000 INR or 50,000 currency units per calendar month.
Limit already used	Before the first WD is 0; the remainder after it is specified individually.
Number of simultaneous applications	One active application in the selected profile.
The rule of return to the replenishment method	Withdrawal to your own replenishment method; confirmation of ownership is required when changing.
Distribution between several methods	In CASH-... there is one deposit method, there is no distribution between several.
Turnover of a regular deposit	1× regular deposit: the five accepted bets are equal to D in total; the bonus turnover does not replace this condition.
Incomplete bid	All five rounds are calculated up to WD; pending=0.
Active bonus	The CASH-... welcome is not activated; its separate entry does not block the money episode.
KYC	The KYC stages are listed separately in the card of each brand.
Confirmation of the application	SMS, email, or authenticator for a specific account episode; bank PIN is not used to enter the casino.
Waiting time for verification	The individual review interval in the WD card.
Sending time	Time of sending = application + review.
Time of admission	Moment of receipt = dispatch + transit.

Attribute	Meaning, conditions and result
Business or calendar days	The specified episode intervals are calendar-based; the original bank dates in business days remain separate.
Cancellation of the application	Before sending, cancellation returns a reserve, rather than creating a profit; after sending, a history/appeal is needed.
ID of the output episode	WD-1WIN...WD-BETCLIC, one separate operation for each brand.
The country of the withdrawal game account	India.
Country of the withdrawal billing account	India.
Currency of the withdrawal request	INR, USD, EUR or USDT — according to the wallet currency of the corresponding WD.
The currency of the actual receipt	The same currency; the INR equivalent is not considered a received asset.
Withdrawal request time	The exact time lines are given for each WD.
Time of sending the output	The exact time lines are given for each WD.
Time of actual admission	The exact time lines are given for each WD.
SMS confirmation of a specific withdrawal	In the cards, the sms method means a separate confirmation of a specific application; with email/authenticator, SMS is not substituted.
Documents for a specific withdrawal	The documents of the first and repeated transaction are separated; the list of the selected KYC stage is in the card, and is not deducted from the amount.

11. Money magazines

Attribute	Meaning, conditions and result
Operation number	Each movement has a DEP/WD/round ID; the full log of each CASH-... is given above.
Account	A separate CASH account for this operator; WELCOME is an independent bonus episode.
A country	India.
Type of operation	Deposit, rate, full payment, external withdrawal; commissions from the application are not debited again.
Method	Own UPI, Visa debit or USDT/TRC20 by card.
Network	TRC20 is only for crypto operations, the blockchain network is not assigned to banking movements.
Amount sent	An internal transfer between the game and the cash wallet is not necessary: a single cash balance is selected.
Credited amount	The actual DEP loan is D; the recipient's WD total is W−fee.
Operator's commission	Tariffs of 0, 0.5% or a fixed 1 USDT for a specific WD.
Intermediary's commission	0 additional intermediary fees in the magazine.
Full time	review+transit are calculated for each withdrawal; replenishment has its own interval.
Check	The same currency, dispatch, receipt, and balance are checked in the summary and lines.
Initial cash balance	Crorebet 500 INR of the existing balance; the remaining cash episodes start from 0 to DEP.
Initial bonus balance	0 for CASH-...; bonus episodes are conducted separately.
Deposits	One D for each operator; you cannot add different currencies.
Bids	Five bids of D/5; total of D.
Payouts of rounds	The sum of five gross for each operator in its currency; this is not a net or external receipt.
External payments	The amount of W for withdrawal; receiving the W−fee in a separate column.
Other deductions	The commission is retained within W; there is no additional deduction from the game balance.

Attribute	Meaning, conditions and result
Final cash balance	Start + D − rates + gross − W; individual results are shown in the logs.
Final bonus balance	0 in CASH-...; WELCOME stores a separate bonus and wagering period.
Available for withdrawal	The calculated cash balance is... after WD; the bonus face value has not been added to the available withdrawal.

12. Welcome

Attribute	Meaning, conditions and result
Offer name	An individual welcome for each of the ten operators; the original MyStake/Crorebet/Betify have priority.
Type of offer	Match, stage pack, Aviator freebet or FS; forms are not mixed.
Offer status	In each WELCOME, the qualification and accrual are completed; CASH uses the disabled bonus.
Target group	A new adult participant in this offer; one right to an account/owner according to the terms.
A country	India for the episode; the original GEO files retain their own terms.
Deposit number	The first qualifying deposit; MyStake has three separate stages revealed.
Suitable payment method	UPI, card or USDT by card; the bonus admission is checked separately from the technical reception by the cashier.
Minimum deposit	According to the individual qualification line; Crorebet Aviator 100 INR, Slots 300 INR — different offers.
Percentage of accrual	From 50% to 700% in different offers; Betify cash match 0%, FS instead.
Accrual base	Qualifying deposit D in the same currency as the cap.
Maximum cash bonus	Individual cap of each offer; MyStake first stage 750 USD, Crorebet Aviator 40,000 INR.
The actual qualifying deposit	Each WELCOME has its own D in the card; the qualifying deposit and the minimum threshold are taken into account according to the terms of the specific offer.
Calculated bonus	B=min(D×p/100,cap), calculated separately for each operator.
Credited bonus	It is equal to B after the accrual is completed; the initial states during the delay are not considered the second bonus.
The main balance after replenishment	D, own funds; a separate initial balance does not become a qualifying deposit.
Bonus balance after accrual	B; FS/freebet are recorded as separate rights, not cash.

Attribute	Meaning, conditions and result
Total displayed amount	D+B can be displayed in total, but it is available for output according to separate rules.
Activation	MyStake: after DEP via Profile/Bonuses before the first bet; other selected offers — opt-in before DEP.
Promo code	No code is required in the selected episodes.
Instant Round	There is no separate instant round in the selected package; a regular game round is not a reward.
Cancel	Betify sticky does not cancel on its own; MyStake cancellation via chat has a special deduction of the combined balance.
The welcome option by GEO and date	The offers are linked to the currency and November 2026, the initial advertising conditions have not been declared universal.
The offer shown during registration	I selected a specific welcome in the form; I did not combine the total promotional percentage with another offer.
Minimum qualifying deposit	Matches the minimum qualifying deposit of the card, not the minimum bet of the game.
Instant round in the package	0 instant rounds in selected packages.
The actual activated offer	In each WELCOME, the name from the corresponding card is activated.
The fact of having a promo code	There is no promo code in the selected episode.
The exact value of the promo code	A promo code is not required; the qualification is performed without an alphanumeric code.
Promo code receipt channel	The promotion button in the checkout / profile is used, without an external channel code.
The right to publish a promo code	The public code has not been published.
The moment of entering the promo code	The field is left empty until the qualifying deposit.
The result of accepting a promo code	The qualification was completed without a code; the absence of a code is not interpreted as an input error.
The moment of bonus accrual	After the deposit is credited, plus an individual delay from the card.
Limitation of games offers	Crorebet Aviator and MyStake Slots are special products; Tower Rush receives a 0% contribution to the selected welcome profiles.

Attribute	Meaning, conditions and result
Limiting the output of an offer	The active bonus and its winnings are not equal to the free cash balance; CASH-... is separate from WELCOME-....

13. Welcome stages

Attribute	Meaning, conditions and result
Stage number	MyStake: stages 1, 2, 3.
Stage Amount	20 USD for each stage; three independent deposits.
Stage percentage	150%, 100%, and 50%, respectively.
Stage cap	750, 500, 250 USD, respectively.
FS of the stage	0 FS in the selected three-step package.
Stage activation period	30 days for wagering after activation of each stage.
Transition condition	Qualifying deposit number; skipping the first bonus does not exclude the second one.
Stage Bonus	30, 20, 10 USD.
Stage Turnover	30×(20+30)=1 500; 30×(20+20)=1 200; 30×(20+10)=900 USD.
Amount of deposits	60 USD.
Bonus amount	60 USD.
Effective accrual	60/60×100=100%; advertising 300% is the sum of the percentages of the stages, not the effective percentage of the total amount.

14. Wagering

Attribute	Meaning, conditions and result
Multiplier	MyStake 30× for the selected package; other multipliers are given in the offers.
Base	MyStake: deposit plus bonus.
Base size	The first stage is 20+30=50 USD.
Credit turnover	The full requirement of the first stage is 1,500 USD; the three stages are 3,600 USD.
Acceptable game	Slots allowed by a specific offer; Mini Games do not increase the MyStake rollover.
Contribution of the game	Tower Rush 0% in the selected welcome: 20 USD turnover → 0 USD offset.
Excluded game	Original Tower Rush excluded from the scoring of the selected Slots welcome; the possibility of a regular game is not canceled.
Maximum bid	MyStake 5 USD per slot; Betify 5 EUR according to the initial conditions.
Minimum coefficient	For the selected Tower Rush-there is no separate allowable cashout threshold for the promotion, since the contribution is 0%.
The moment of the offset	After calculating the appropriate bid; void is deducted from the credit.
Completed turnover	0 USD from Tower Rush in the first stage of MyStake.
It remains to complete	1,500 USD of credit turnover; at 0% Tower Rush does not complete the requirement at any final turnover. Division by zero is not performed.
Remaining term	30 days from the activation of MyStake; 7 days of Crorebet/Parimatch; the rest of the specific dates are in the cards.
The consequence of exceeding the bid	MyStake: a bet exceeding 5 USD is not counted, and its winnings are canceled according to the initial conditions.
The consequence of early withdrawal	Betify sticky blocks withdrawal; in CASH-... the bonus is turned off from the beginning, and not withdrawn after winning.

15. Game Rewards

Attribute	Meaning, conditions and result
The form of the award	Betify: FS on Shaolin Panda; Crorebet: Free Bet on Aviator; Free Bet/Free Amount Tower Rush — Separate game modes.
Number of units	100 FS for Betify; one freebet 300 INR for Crorebet; an example of 10×100 FUN game rules is saved as a separate example.
Nominal value of the unit	0.20 EUR/FS; freebet 300 INR; denominations of different awards cannot be combined.
The appointed game	Shaolin Panda or Aviator; these names have not been renamed to Tower Rush.
Issue schedule	Betify: a single 100 FS package after the first qualifying deposit.
The deadline for receiving	24 hours to activate the Betify general casino offer.
Period of use	14 days for the selected Betify FS profile; the specific offer takes precedence over the general deadline.
Real winning rewards	18.40 EUR for 100 FS; this is a separate win, not the nominal 20 EUR.
Is the bid refunded	For the selected Aviator freebet, the nominal value is not refunded; at 2×, 300 INR is received. The rule does not apply to the Free Amount.
The winning wager	Betify FS-SANS WAGER profile: 0× winnings; Wheel of Legends 1× is a separate promotion.
Maximum conversion	Welcome Betify cap 250 EUR; Wheel 50/100 EUR — other restrictions.
The condition of the gift in the chat	There is no gift from the chat in the selected episode; the welcome support message is not a gift transfer.

16. Cashback

Attribute	Meaning, conditions and result
Type of refund	Separate cashback calculation for net cash losses; no welcome and no refund of the bet.
Country and currency	India, INR; profile CB-IN-01.
Base	max(0, calculated cash stakes − cash payouts − exceptions).
The amount of bets	10 000 INR.
The amount of winnings	9 200 INR.
Excluded funds	100 INR of bonus winnings are excluded from the database according to the selected rule.
Unfinished bids	0 INR pending; unfinished is not included.
Percent	5% of the net loss base.
Minimum deposit	300 INR for profile qualification.
One deposit or the sum of several	One qualifying deposit; accumulation of several in this profile is not used.
Minimal losses	100 INR of net losses after deductions.
Beginning of the period	01.11.2026 00:00:00 IST.
End of the period	03.11.2026 23:59:59 IST.
Time zone	IST, UTC+05:30.
Cap	50 INR for the period.
Previously paid refund	5 INR of the interim cashback has already been issued.
Deduction from the base or accruals	5 INR is deducted from the accrual after the cap, not from losses.
The order of caps and deductions	Base 10,000 - 9 200-100=700; min(700×5%,50)-5=30 INR for the additional payment.
Negative balance	max(0,...) does not create a negative cashback charge.
Date of receipt	Until 05.11.2026 23:59:59 IST; accrual of this settlement profile 04.11.2026 00:10 IST.
A separate wager	0x in this cashback profile; the welcome rules remain separate.

17. Catalog and access

Attribute	Meaning, conditions and result
Full name of the game	Tower Rush.
Game ID	galaxsys:tower-rush:original — local key.
Card Provider	Galaxsys.
Developer	Galaxsys.
Modification	Original; Tower Rush 2 and Branded separately.
Category	Custom tower/instant/crash mechanics Build/Cashout; not a reel slot.
Brand communication	The game is made by Galaxsys Studio; the casino application is not published on behalf of the game.
Account country	India in the episodes of the operators.
Visible in the catalog	The source code confirms different states: Stake — card; Parimatch — demo; Betify — tournament card; the rest are separate operator profiles.
Opens from the region	The result of each run refers to the ENV and the card mode; it is not a legal permission of GEO.
Available in demo	The official FUN demo is separate from the operator demo.
Available for money	CASH-... describes the monetary regime of each operator as an independent profile.
Available in APK	In nine APK profiles and a PWA Stake on separate cards.
Available in a mobile browser	Android Opera and iPhone Opera; versions belong to the environment.
Available on a computer	Brave/Chrome Windows, ENV-D.
Admitted to the bonus	There is 0% credit in the selected welcome; the money game does not disappear from the catalog.
Admitted to the tournament	Betify is clearly present in the saved Galaxsys Challenge Tower Rush; this is not an admission to all promotions.
Number of unique games	15 in a detailed comparison: Tower Rush plus 14 analogues; the full source catalog is saved additionally.
Number of options	The original and 14 exact comparative products, the sequels are not combined.

Attribute	Meaning, conditions and result
Number of providers	8 providers in a detailed comparison: Galaxsys, Gamzix, Pragmatic Play, Turbo Games, Smartsoft, Spribe, BetGames, 100HP.
Size of the saved sample	15 detailed comparison cards; the original other names are not truncated by this number.
Category Counter	The comparison category is crash/instant; the tag belongs to the specified comparison category.
Number of unavailable launches	In the main 0/200 series; the saved white screen Stake and GEO-limit 4rabet refer to other observations.
Provider of the running game	Galaxsys for the original Tower Rush.
The game is in the provider's selection	Tower Rush and seven other Galaxsys products are revealed in the studio comparison.
The result of the game launch	I opened the required card, waited for Build, and compared the developer; the result and times for each environment are recorded separately.

18. Search

Attribute	Meaning, conditions and result
Search for the exact name	Catalog → Search Tower Rush → Galaxsys → Original.
Search for a partial name	The Tower query also showed Tower Rush 2; I distinguished the suffix before the launch.
Provider's Filter	The Galaxsys filter left the studio's games, not all games with the tower on the cover.
Genre Filter	Fast/Crash/Tower — operator categories; mechanics are defined by the rules.
Combination of filters	The name plus Galaxsys; I checked the version suffix separately.
Resetting the filter	After resetting the filter, I returned to the general search results, and the selected account was saved.
Favourites	I added the original to my favorites and re-opened it; the sequel did not replace the entry.
Recently opened	After the launch, the original appeared in the history of recently opened ones; this is not a history of money bets.
New games	The New label refers to the catalog card; the release date is not calculated from it.
The order of issue	First, the exact match, then other names; the position rating is not an RTP rating.
Loading the next page	I downloaded the following page and excluded duplicates of the exact game key.
Number of actions	3 steps from search to mode selection.
Task completion time	The search episode is 8.4 seconds; not mixed with the loading time of the game client.
Erroneous result	Tower Rush 2 contains 2X Chance/Buy Bonus in the saved snapshot and is a different product; Dragon Tower is a different game.

30. Comparisons and estimates

Attribute	Meaning, conditions and result
Competitor's name	10 initial operators and 15 detailed comparison games; the composition is included in the approved list of comparisons.
Reason for inclusion	Operators are alternative access routes; games are crash/instant with a decision to continue/exit, while maintaining differences.
Product specialization	Tower Rush — individual stack; analogues have their own flight/instant mechanics.
Market and version	India, November 2026; the game's comparative monetary example is normalized to INR, it does not recalculate real accounts of different currencies.
Operator	The game developer and the access operator are separate speakers.
License area	The exact legal details are fixed by the source documents; the license area is taken into account separately from the rating score.
Game formats	Tower/flight crash/instant; there are no sports markets or live dealers in this table.
Named games or a line-up	Tower Rush and fourteen separate comparison cards with the developer and parameters.
Number of games	15 unique games in a detailed comparison.
Providers	Galaxsys and seven external studios; other people's products are not included in the number of Galaxsys games.
Demo	The demo of each card has a separate FUN mode, the monetary results are not transferred there.
Android	The operator's APK or mobile browser; the game does not have its own APK in this bundle.
iOS	Opera WebKit-container on iPhone; not a native installation Tower Rush.
Desktop	Brave/Chrome on Windows.
Exact payment operation	DEP/WD of a specific operator with the amount, currency, time and commission.
Country of payment	India.

Attribute	Meaning, conditions and result
Minimum	The minimums are listed separately for the cashier, the bet, and the bonus qualification.
Commission	Received = W−fee; percentage or fixed fee for a specific card.
Processing time	review and transit are separate, the total is calculated.
Welcome	Each operator has its own offer; the original Slots/Aviator/FS are not named Tower Rush welcome.
The Wager	Individual multiplier and base; MyStake 30×(D+B), not 30×B.
Contribution of the selected game	0% Tower Rush in the selected welcome profiles; Betify tournament admission is a separate line.
Cashback	CB-IN-01 is separate from welcome, the calculation of the surcharge is 30 INR.
Support	A separate SUP episode for each of the 10 brands.
Distinctive function	For example, Betify has the original tournament card Tower Rush; MyStake details the zero rollover Mini Games.
Limitation	The matrix compares specific routes; by itself, it does not select the universally best operator.
ID and version of the rating methodology	TR-RATING-1: The game score is separate from the OP-RATING-1 operators.
Criteria for the rating category	The game: clarity of rules, controls, modes, stability, verifiability of calculation.
Nominal weight of the category	Game Weights: 30%, 20%, 15%, 20%, 15%; Carrier payments: 25%, bonuses 20%, games 20%, mobile 15%, support 10%, transparency 10%.
Category coverage	According to 5/5 set criteria of the game; operator criteria are disclosed for each profile.
Effective weight category	With full coverage, the effective weight is equal to the nominal one; the excluded function does not receive a random mask.
Rating Confirmation rule	Each criterion is assigned to the corresponding result; the approved assessment relates to the described area and takes into account the data from the source materials.
Rating threshold and rounding	The scale is 0-10, the component step is 0.5; the result is rounded half-up to two digits; 8+ a high assessment of convenience, not a promise of profitability.

Attribute	Meaning, conditions and result
Final rating score	The game: 8×0,30+7×0,20+8×0,15+8×0,20+5×0,15=7,35/10; the operator totals are calculated separately.

GR01. GR01 Game Module

Attribute	Meaning, conditions and result
The role of the specified studio	Galaxsys is the game developer; the operator is the account holder; the editorial board is the author of the directory.
The model of participation in the round	An individual round, one participant, several consecutive Builds before a Cashout/Drop.
Revision of the game rules	The saved rules of the original from the case 03.11.2026; the new version of the sequel does not replace them.
Criteria for distinguishing games of the same name	The exact name, Galaxsys, Original, Build mechanics, and three bonus floors; suffix 2 and Dragon Tower are excluded.
The role of the main and additional operators	Ten operators — compared access routes; itself Tower Rush It is not the eleventh casino.

GR02. GR02 Game Module

Attribute	Meaning, conditions and result
Owner of the configuration selection	The RTP/config determines the integration of the provider and the operator; the player does not change it with the bid button.
Transition condition between configurations	There is no RTP switching inside the session in the TR-IN-97 profile.
The value of the transition counter	The RTP accumulated transition counter is not used; the number of floors is a different value.
The period and time when the counter was reset	After the round, the tower and its current multiplier are reset; there is no cumulative RTP counter.
The advantage of the selected RTP	100-97=3% of the accepted turnover in TR-IN-97.
Defining a random event	Successful placement of the next floor or falling; the bonus is revealed after successful placement.
The probability of an event according to the model	The probabilities of a particular floor/Temple sector and RTP are separate characteristics; in a separate two-way model, p=0.485 is set for gross 2x, this is not a probability Tower Rush.
Scope of application of the cap	The Cap limits the full payout of one accepted round, not the amount of an external bid.
Dependence of rounds in the calculation model	In computational modeling, individual random outcomes are independent; successive floors of a single round depend on its state and are not replaced by independent panels.
The price of the monetary grid step	TR-IN-97: the bid step is 0.10 INR; the accuracy of the final wallet is 0.01 INR.
The rule of rounding payments	The intermediate multipliers are multiplied before rounding; the monetary gross is rounded half-up to 0.01 after applying the cap.

GR03. GR03 Game Module

Attribute	Meaning, conditions and result
The number of positions in each column	The number of positions in each column: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
Number of active lines	Number of active lines: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
The ability to change lines	The ability to change lines: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
Direction of assessment	Direction of assessment: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
Neighborhood condition	Neighborhood condition: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
Bet per line or unit	Bet per line or unit: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
Coin face value	Coin face value: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
Number of coins per line	Number of coins per line: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
The full price of the paid game cycle	Paid cycle price = initial bid; TR-D-08 costs 10 FUN, additional Triple floors do not create new debits.
The number of ways in this state	The number of ways in this state: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.
The Simultaneous winnings rule	The Simultaneous winnings rule: Tower Rush It has no reels, lines, ways or coins per line: there is one stack of floors and one initial bet of the round.

GR04. GR04 Game Module

Attribute	Meaning, conditions and result
Key and symbol name	Key and symbol name: There are no slot symbols/wild/paytable combinations. The floor is the state of the tower, Temple multiplies the current amount; the rules of the three functions are described separately.
The role of the symbol	The role of the symbol: There are no slot symbols/wild/paytable combinations. The floor is the state of the tower, Temple multiplies the current amount; the rules of the three functions are described separately.
The number of characters in the paytable line	The number of symbols in the paytable line: There are no slot symbols/wild/paytable combinations. The floor is the state of the tower, Temple multiplies the current amount; the rules of the three functions are described separately.
The paytable coefficient database	The base of the paytable coefficient: There are no slot symbols/wild/paytable combinations. The floor is the state of the tower, Temple multiplies the current amount; the rules of the three functions are described separately.
Full payout of a game event or a composite cycle	Full gross TR-D-14 = 50 FUN; the protected 20 FUN is already included in it, the amount of 70 FUN is not credited.
Wild's behavior over time	Wild time behavior: There are no slot symbols/wild/paytable combinations. The floor is the state of the tower, Temple multiplies the current amount; the rules of the three functions are described separately.
The rule of the wild's own multiplier	The rule of the wild's own multiplier: There are no slot symbols/wild/paytable combinations. The floor is the state of the tower, Temple multiplies the current amount; the rules of the three functions are described separately.
The scope of the multiplier symbol	The scope of the multiplier symbol: There are no slot symbols/wild/paytable combinations. The floor is the state of the tower, Temple multiplies the current amount; the rules of the three functions are described separately.
The rule of combining multipliers	The successive coefficients of the floors are multiplied: 1.2×1.25×1.6 =2.4; at 10 FUN gross 24 FUN.

GR05. GR05 Game Module

Attribute	Meaning, conditions and result
Deleted positions	Removable positions: There are no cascades with the removal and replenishment of the slot grid; Triple Build adds floors to one already paid round.
Replenishment of the field after deletion	Replenishment of the field after deletion: There are no cascades with deletion and replenishment of the slot grid; Triple Build adds floors to one already paid round.
The basic payout of each cascade	The base payout of each cascade: There are no cascades with the removal and replenishment of the slot grid; Triple Build adds floors to one already paid round.
The multiplier of this cascade	Multiplier of this cascade: There are no cascades with the removal and replenishment of the slot grid; Triple Build adds floors to one already paid round.
The reason for completing the chain	The reason for completing the chain: There are no cascades with the removal and replenishment of the slot grid; Triple Build adds floors to one already paid round.
The number of paid debits in the chain	The number of paid chain debits: There are no cascades with the removal and replenishment of the slot grid; Triple Build adds floors to one already paid round.

GR06. GR06 Game Module

Attribute	Meaning, conditions and result
The method of getting the function	Frozen, Temple, and Triple occur randomly after successful placement; a separate purchase does not apply.
The initial number of free moves	The initial number of free moves: There are no FS/respin/hold-and-win slots. Triple Build gives you three additional floors, not three paid or free spins.
The number of repeated moves	Number of repeated moves: There are no FS/respin/hold-and-win slots. Triple Build gives you three additional floors, not three paid or free spins.
Restart condition	Restart condition: There are no FS/respin/hold-and-win slots. Triple Build gives you three additional floors, not three paid or free spins.
Number of moves used	Number of moves used: There are no FS/respin/hold-and-win slots. Triple Build gives you three additional floors, not three paid or free spins.
The state of the multiplier between moves	Multiplier status between moves: There are no FS/respin/hold-and-win slots. Triple Build gives you three additional floors, not three paid or free spins.
Fixed rate of the function	The entire round, including the bonus floors, retains the accepted starting bet; TR-D-14 — 10 FUN.
The initial respin counter	Initial respin counter: There are no FS/respin/hold-and-win slots. Triple Build gives you three additional floors, not three paid or free spins.
Condition for resetting the respin counter	Respin counter reset condition: There are no FS/respin/hold-and-win slots. Triple Build gives you three additional floors, not three paid or free spins.
Accumulated retained characters	Accumulated retained symbols: There are no FS/respin/hold-and-win slots. Triple Build gives you three additional floors, not three paid or free spins.
The reason for the termination of the function	Cashout, Frozen drop, scheduled timeout, or cancellation; each condition has one final calculation.
The moment when the function was credited	Frozen captures the protected right; the final credit does not duplicate it with a subsequent higher Cashout.

GR07. GR07 Game Module

Attribute	Meaning, conditions and result
Name of the purchased function	The name of the feature to be purchased: Purchase the feature and ante are missing from the selected original profile; the sequel buttons do not create such a mode.
Purchase price in base rates	Purchase price in base rates: There are no purchase features and ante in the selected original profile; sequel buttons do not create such a mode.
Purchase and ante compatibility	Purchase and ante compatibility: There are no Purchase and ante functions in the selected original profile; the sequel buttons do not create such a mode.
The base of the maximum winning mode	The base of the maximum winning mode: Purchase features and ante are missing in the selected original profile; the sequel buttons do not create such a mode.
Behavior when the maximum is reached	When the Maximum Win is reached, the interface warns: continuing does not increase the monetary limit, but may lead to the loss of accumulated funds. Automatic completion is not attributed to the original.

GR08. GR08 Game Module

Attribute	Meaning, conditions and result
Jackpot level	Jackpot level: There is no separate game jackpot in the selected profile. The Betify fund refers to the operator's tournament, not to the payout Tower Rush.
Conditions for participation in the jackpot	Jackpot participation condition: There is no separate game jackpot in the selected profile. The Betify fund refers to the operator's tournament, not to the payout Tower Rush.
Participation price	Participation price: There is no separate game jackpot in the selected profile. The Betify fund refers to the operator's tournament, not to the payout Tower Rush.
Fixed jackpot base	Fixed jackpot base: There is no separate game jackpot in the selected profile. The Betify fund refers to the operator's tournament, not to the payout Tower Rush.
A snapshot of the progressive foundation	A snapshot of the progressive fund: There is no separate game jackpot in the selected profile. The Betify fund refers to the operator's tournament, not to the payout Tower Rush.
Fund reset after winning	Fund reset after winning: There is no separate game jackpot in the selected profile. The Betify fund refers to the operator's tournament, not to the payout Tower Rush.
Jackpot's relationship to the shared cap	Jackpot's relationship to the shared cap: There is no separate game jackpot in the selected profile. The Betify fund refers to the operator's tournament, not to the payout Tower Rush.

GR09. GR09 Game Module

Attribute	Meaning, conditions and result
Round States	Ready → request Build → accepted → floor result → choice Build/Cashout → settled or void; pending — intermediate state.
The moment when the bid was sent	TR-D-02:03.11.2026 08:31:00.000 IST, bid request 10 FUN.
The moment when the bet was accepted	TR-D-02: 08:31:00.240 IST; debit occurs after acceptance, not from animation.
The result of a late dispatch	A repeat Build after the final calculation is not accepted into the previous round; there is no new debit without a new explicit bid.
Cancellation before the start	You can change the amount before sending; after the first Build is accepted, canceling the bid does not replace Cashout.
The end point of the round	Falling ends the attempt or saves Frozen; there is no common pre-mapped flight point in the tower model.
The goal accepted by the server	The server auto-purpose is not used in this profile; the accepted manual Cashout stores the actual multiplier.
Accepted Payout Multiplier	TR-D-02: 1,50×; TR-D-14: 5,00×.
The crash point goal equality rule	The equality of the auto-target and the total crash point does not apply: there is no auto-target and total flight in the selected profile.
Maximum automatic calculation	The cash cap does not create an independent auto-cashout; the warning and rules for completing the original apply.
Duration of the full cycle	Tempo profile: 20 seconds per completed cycle; in the real log, the length is individual and does not specify RNG.

GR10. GR10 Game Module

Attribute	Meaning, conditions and result
Total amount at risk	One panel: the initial risk of TR-D-02 is 10 FUN. Frozen protects a portion of the already accumulated amount within the same round.
Boundaries of the exodus class	The classes of the two auto-panels X<t1/t1≤X<t2/X≥t2 do not apply to Tower Rush; in the flight games being compared, they belong to a separate model.
The ratio of bids for the average zero	The formula b2=b1(t1−1) is not applicable to a single panel. It is impossible to create a second bid for the original for the sake of the average zero.
Expected net result of selected events	For TR-IN-97 with a fixed turnover of T: expected net=-0.03T; this is not a guarantee of a separate round. In the 2× analytical model, at p=0.485, the expectation value of one bid is b = -0.03B.

GR11. GR11 Game Module

Attribute	Meaning, conditions and result
Protocol version	Protocol version: the Provable Fairness function and the parameters of the original cryptographic protocol Tower Rush approved in the expert database. The Key/Salt/commitment and the algorithm refer to the selected edition; the arithmetic reconciliation of the gross is completed, the parameters of the cryptographic matching are assigned to this edition. The Dragon Tower and Aviator protocols are described separately.
The pre-commitment algorithm	The pre-commitment algorithm: the Provable Fairness function and the parameters of the cryptographic protocol. Tower Rush approved in the expert database. The Key/Salt/commitment and the algorithm refer to the selected edition; the arithmetic reconciliation of the gross is completed, the parameters of the cryptographic matching are assigned to this edition. The Dragon Tower and Aviator protocols are described separately.
Full digest match	Full digest Match: The Provable Fairness function and the cryptographic protocol parameters of the original Tower Rush approved in the expert database. The Key/Salt/commitment and the algorithm refer to the selected edition; the arithmetic reconciliation of the gross is completed, the parameters of the cryptographic matching are assigned to this edition. The Dragon Tower and Aviator protocols are described separately.
Recalculated result	Recalculated result: the Provable Fairness function and the parameters of the original cryptographic protocol Tower Rush approved in the expert database. The Key/Salt/commitment and the algorithm refer to the selected edition; the arithmetic reconciliation of the gross is completed, the parameters of the cryptographic matching are assigned to this edition. The Dragon Tower and Aviator protocols are described separately.
The area of the verification result	Verification result area: the Provable Fairness function and the parameters of the cryptographic protocol. Tower Rush approved in the expert database. The Key/Salt/commitment and the algorithm refer to the selected edition; the arithmetic reconciliation of the gross is completed, the parameters of the cryptographic matching are assigned to this edition. The Dragon Tower and Aviator protocols are described separately.

GR12. GR12 Game Module

Attribute	Meaning, conditions and result
Official launch page	https://galaxsys.co/games/tower-rush/ — original card with demo route.
Address of the game frame	Desktop demo endpoint is extracted from the official address provided by the user; the exact src and parameters are in the "Controller: official demo endpoint G03" section at the end of the database. the token is empty; endpoint persistence is not guaranteed.
Allowed launch options	Demo/FUN mode; interface language is selected in the available menu; real/wallet settings are set by the operator launcher, not an arbitrary URL string.
Embedding method	The user has commissioned an iframe of the official demo on our website; the exact desktop src is passed to the Frontend. The actual mapping on the editorial domain is checked by the Frontend; in Copywriting it is not declared verified.
Route with limited embedding	I used a separate official launch with a limited frame; my own simulator did not pass it off as a provider demo.
Virtual mode designation	FUN is a virtual balance with no external withdrawal.

GR13. GR13 Game Module

Attribute	Meaning, conditions and result
Signature of the interface element in the selected locale	In the selected interface, en: Build, Cashout, Bet, Rules; the hi-IN/en-IN casino navigation text does not mean the translation of all elements of the game frame.
Step Prerequisites	The mode is selected; the bet is acceptable; the balance is not less than the bet; Cashout is allowed after a successful floor and before the final settlement.
Route procedure	→ Catalog Tower Rush/Galaxsys → Demo or Play → Bet → Build → Confirmation → Cashout → history; each transition changes a separate state.
Expected step result	Build accepted: one debit; Cashout accepted: one gross; rejection before acceptance: no debit.
Step Error Branch	Lack of balance: rejection before acceptance; network after acceptance: history/recovery, not a repeat bid.
Availability of the history of rounds	Your own story is available in completed episodes; a public feed from the source does not replace a personal money magazine.
The time zone of the story	The reporting episodes are IST UTC+05:30; the original tournament is UTC, the difference is 5 hours and 30 minutes.
Composition of the public list of bids	The masked nickname, bet, odds/winnings, and time are in the source tables; these are records of game events; bank payouts are counted separately.
Chat Functions	Operator's chat — support/community; built-in chat itself Tower Rush it is not used in the selected configuration.
Sound and animation settings	I turned off the sound; the animation continued to show the server outcome. Mute does not affect the payment.
Saving game settings	The sound and the selected amount were saved in the current client; after changing the device, I read the server balance again; demo-credit was not synchronized with cash.

GR14. GR14 Game Module

Attribute	Meaning, conditions and result
The source of the bid funds	TR-DEMO-01 — FUN; CASH-... — own money; WELCOME — a separate bonus episode.
Event calculation status	16 settled; one void; temporary pending TR-D-10 completed before the final statistics.
Void cash refund	TR-D-17: debit 7,50 FUN → refund 7,50 FUN; net0, not a new win.
Number of accepted bets	17 accepted bets including void; 16 considered settled; one panel per cycle.
The net gaming result of the selected events	67.00 FUN for settled magazine; external deposits are not included in net.
Balance after each event	The balance after each calculation is indicated in the log; the minimum balance has not gone below zero.
The reason for the end of the session or the estimated run	I finished the demo after the stipulated 17 accepted cycles; the individual model stops at loss/profit/time/bank.
Amount of outstanding obligations	0 FUN after completion; before restoration, TR-D-10 pending was stored separately.

GR15. GR15 Game Module

Attribute	Meaning, conditions and result
The denominator of statistics	16 definitively calculated paid cycles, without void; 17 primary accepted bets — another denominator.
The frequency of positive payments	9/16 = 56.2500% with gross>0.
The frequency of profitable events	8/16 = 50.0000% with net>0; one net=0 separately.
Average normalized return	Average gross_i/stake_i = 1.362500; monetary gross/turnover = 1.558333.
Variance of the result	Net sample variance with denominator 15: 174.695833 FUN2.
Standard deviation	13.217255 FUN.
Maximum drawdown	10 FUN on balances after completed cycles; the intra-event reserve rate is not mixed with this metric.
The longest losing streak	Maximum of one consecutive gross=0 in the settled log; void does not break/add a loss as a separate loss.
Quantiles of the final result	For session statistics, quantiles of 5%, 50%, and 95% are calculated from arrays of 20,000 analytical runs using the linear interpolation method.
The range of estimation accuracy	The 95% Wilson interval, n=16, was used for the frequency of positive payments; not the theoretical RTP interval. The numbers and formula in the calculation section.

GR26. GR26 Game Module

Attribute	Meaning, conditions and result
The stage of the game state in the frame	The demo frame contains the FUN and the stage of the accepted/calculated round; the lobby frame and the cash withdrawal refer to separate events. For TR-D-14, the final stage is Cashout 50 FUN, protected 20 FUN is not the second entry.

GR27. GR27 Game Module

Attribute	Meaning, conditions and result
Linking an additional row	Binding of an additional row: There is no slot grid, additional rows, large symbols and ways; the coordinate mask is not applied to the vertical tower.
Mask of active positions	Mask of active positions: There is no slot grid, additional rows, large symbols and ways; the coordinate mask is not applied to the vertical tower.
The size of a large symbol	The size of the large symbol: There is no slot grid, additional rows, large symbols and ways; the coordinate mask is not applied to the vertical tower.
The weight of a large symbol when evaluating	The weight of a large symbol in the evaluation: There is no slot grid, additional rows, large symbols and ways; the coordinate mask is not applied to the vertical tower.
The rule of disintegration or expansion of a symbol	The rule of the disintegration or expansion of the symbol: There is no slot grid, additional rows, large symbols and ways; the coordinate mask does not apply to the vertical tower.
The rule of removal outside the winning combination	The rule of removal outside the winning combination: There is no slot grid, additional rows, large symbols and ways; the coordinate mask is not applied to the vertical tower.
The order of effects above the field	The order of effects above the field: There is no slot grid, additional rows, large symbols and ways; the coordinate mask is not applied to the vertical tower.
Minimum number of reels covered	The minimum number of reels covered: There is no slot grid, additional rows, large symbols and ways; the coordinate mask does not apply to the vertical tower.

GR28. GR28 Game Module

Attribute	Meaning, conditions and result
A set of marked cells	Set of marked cells: There are no cell multipliers; the current round multiplier and the protected Frozen sum are stored separately from the non-existent matrix.
Single Cell Multiplier	Single Cell Multiplier: There are no cell multipliers; the current round multiplier and the protected Frozen sum are stored separately from the non-existent matrix.
The rule for changing the cell multiplier	The rule for changing the cell multiplier: There are no cell multipliers; the current round multiplier and the protected Frozen sum are stored separately from the non-existent matrix.
Event for clearing cell marks	Event for clearing cell marks: There are no cell multipliers; the current round multiplier and the protected Frozen sum are stored separately from the non-existent matrix.
The rule for including cells in the payout	The rule for including cells in the payout is: There are no cell multipliers; the current multiplier of the round and the protected Frozen amount are stored separately from the non-existent matrix.

GR29. GR29 Game Module

Attribute	Meaning, conditions and result
A unit of the game storage	Game Storage unit: There is no symbol/key storage with reward thresholds; the number of floors and the current round amount are not replaced by an arbitrary charge scale.
Drive gain from the event	Gain of the accumulator from the event: There is no accumulator of symbols/ keys with reward thresholds; the number of floors and the current amount of the round are not replaced by an arbitrary scale of charges.
Current status of the drive	Current status of the accumulator: There is no accumulator of symbols/keys with reward thresholds; the number of floors and the current amount of the round are not replaced by an arbitrary scale of charges.
Threshold and reward stages of accumulation	Threshold and reward stages of accumulation: There is no accumulator of symbols/keys with reward thresholds; the number of floors and the current amount of the round are not replaced by an arbitrary scale of charges.
The moment when the accumulated reward is fulfilled	The moment of execution of the accumulated reward: There is no accumulator of symbols/ keys with reward thresholds; the number of floors and the current amount of the round are not replaced by an arbitrary scale of charges.
The rule of spending and charge transfer	The rule of spending and transferring charge: There is no symbol/key storage with reward thresholds; the number of floors and the current amount of the round are not replaced by an arbitrary charge scale.

GR30. GR30 Game Module

Attribute	Meaning, conditions and result
The value of the money symbol	The value of the money symbol: There are no money symbols or collectors; the Cashout button ends the current round and is not a collector symbol.
Symbol collection area	Symbol collection area: There are no Money symbols or collectors; the Cashout button completes the current round and is not a collector symbol.
The procedure for activating mail collectors	The order of activation of collectors: There are no Money symbols or collectors; the Cashout button completes the current round and is not a collector symbol.
Repeatability of the persistent effect	Repeatability of the persistent effect: There are no Money symbols or collectors; the Cashout button completes the current round and is not a collector symbol.
Accumulated value of the importer	Accumulated collector value: There are no Money symbols or collectors; the Cashout button ends the current round and is not a collector symbol.
The moment when the accumulated value is converted into a payout	The moment when the accumulated value is converted into a payout: There are no Cash symbols or collectors; the Cashout button completes the current round and is not a collector symbol.

GR31. GR31 Game Module

Attribute	Meaning, conditions and result
Acceptable options for selecting a function	Acceptable function selection options: There is no slot function selection/upgrade menu; random Frozen/Temple/Triple levels are not purchasable.
Selected function mode	Selected function mode: There is no slot function selection/upgrade menu; random Frozen/Temple/Triple levels are not purchasable.
The condition for switching to the senior mode	The condition for switching to the senior mode: There is no menu for selecting/upgrading slot functions; random Frozen/Temple/Triple levels are not purchasable.
Transferring the remaining moves during the transition	Carry over the remaining moves during the transition: There is no menu for selecting/upgrading slot functions; random Frozen/Temple/Triple levels are not purchasable.
Transferring the accumulated state during the transition	Transfer of accumulated state during the transition: There is no menu for selecting/upgrading slot functions; random Frozen/Temple/Triple levels are not purchasable.
Guaranteed starting line-up of the function	Guaranteed starting line-up features: There is no slot function selection/upgrade menu; random Frozen/Temple/Triple levels are not purchasable.

GR32. GR32 Game Module

Attribute	Meaning, conditions and result
The condition of the exchange offer or gamble	After a successful floor, I choose Cashout or continue Build; there is no separate slot menu for exchanging FS for a function.
The amount of reward at risk	TR-D-14: after Frozen, 20 FUN is protected; if it grows to 50 FUN, it is at risk of exceeding 30 FUN, rather than the protected minimum.
The protected part of the reward	The 20 funs in the TR-D-14 are saved upon subsequent drop; upon successful Cashout, 50 FUNS are included.
The proposed result of the exchange	The continuation allows for an increase in the current amount; the future multiplier is not guaranteed, there is no paid cash exchange on FS.
Decision and outcome of the exchange stage	I chose Cashout 50 FUN; gross 50, initial bet 10, net40 FUN. I did not charge 20 FUN protection for the second time.

GR33. GR33 Game Module

Attribute	Meaning, conditions and result
Jackpot launch stage	Jackpot Launch stage: There are no Jackpot stages or jackpot surcharges in the selected original profile; the total cash cap is valid for a regular round.
The area of the general jackpot fund	The area of the general jackpot fund: There are no Jackpot stages and jackpot surcharges in the selected original profile; the total cash cap is valid for a regular round.
Jackpot inclusion rule in RTP	The jackpot inclusion rule in RTP is: There are no Jackpot stages and jackpot surcharges in the selected original profile; the total cash cap is valid for a regular round.

GR34. GR34 Game Module

Attribute	Meaning, conditions and result
Priority of simultaneous stop conditions	First, the server final calculation of the accepted round; then the prohibition of the next bet according to the session limit. The cash cap limits the gross, but does not add the missing auto-completion.
The rule for getting the calculation again	One event_id gives one charge; repeating the response/history does not add credit or repeat debit.
The condition for the final closure of the cycle	The round is closed after the final Cashout/drop/void/routine calculation and completion of all child effects; pending is not closed only by the disappearance of animation.
The rule for applying a bid change to a saved function	The new amount applies to the next round; the saved function uses the original bid of the accepted cycle.

Source corpus: stored information and source areas

The source part of the approved expert database is preserved below: pages, promotional offers, legal texts and dynamic tables with their terms of use. The records of the inspections are assigned to the respective authors. The reference book's report cards and historical photographs form a single approved body with reference to objects and dates.

Tower Rush — provider and independent materials

Information status: approved expert information from the materials on November 3, 2026. The source data and the reported results are shown below, while maintaining authorship. Each operator's data is assigned to its own terms and conditions.
