Melbet Russia: introductory rules and Birthday Bonus

Tower Rush India | https://towerrushindi.com/en/casinos/

Russian-market material: scope and fragmented rules

This reference preserves the supplied Melbet Russia material as a separate market record. RUB gaming coupons, Russian identification procedures and melbet.ru contacts do not establish the same offer for an international or Indian account, or eligibility for Tower Rush. The following rules are the archived operator conditions, not a fresh verification of availability or legal enforceability.

The introductory extracts mention an MFC public-service procedure using a passport and residence information, and equipment/software used to determine gambling outcomes, without enough surrounding text to identify a complete procedure. They describe an accumulator as independent events that must all win, with combined odds obtained by multiplication; live odds may change after two seconds or a goal. A forecast may concern one or several events, and all video reviews count regardless of who initiated them. Fighting bouts can end before the scheduled number of rounds; an early wrestling-period victory counts irrespective of score. Esports teams are described as mainly one, two, three or five players.

Unlabelled format fragments list two halves of seven, six or five minutes; three, seven or nine innings; two periods of six or eight minutes; two halves of ten or five minutes; and a championship-dependent number of frames. Their missing sport labels are not reconstructed. The source warns that gambling offers no guaranteed win and can cause loss and addiction.

Birthday Bonus: dates, qualification and calculation

The Birthday Bonus campaign runs in the saved rules from 1 April 2023 at 12:00 to 30 November 2027 at 23:59, UTC+3. The operator may change the campaign or use pre-campaign records. Registration and identification must be completed by its end. The broad player definition requires total calculated loss, OSP, of at least one unit across the calculation month and the preceding 25 months; the actual monthly award rule requires OSP of at least 20,000 units. VIP Birthday participants are excluded. Participation is free, with written or other available opt-out.

The calculation month is the calendar month preceding the birthday month, from 00:00 on its first day to 23:59:59 on its last, UTC+3. The recorded formula is OSP = Sis − Sv − Sos − Sp. Sis is all interactive stakes in the relevant period and Sv is all winnings paid in it. This extracted birthday subsection does not define Sos and Sp, so neither is silently assigned a meaning.

All birthday award bands

Monthly OSP, conditional units	Possible bonus, coupon units
20,000–49,999	500
50,000–99,999	1,000
100,000–299,999	5,000
300,000–999,999	10,000
1,000,000 or more	20,000

These are discretionary bands, not an entitlement. At most one birthday prize is issued per year, in the birthday month, within seven calendar days of the birthday. The individual amount is 500–20,000 coupon units. The operator checks the previous calculation month and may refuse participation or a prize without explaining why; the saved offer says refusal cannot be challenged.

Birthday play-through and withdrawal boundary

One forecast must use the bonus within 168 hours of credit. If the operator accepts compliance, it may credit an amount equal to the original bonus to the main account. This birthday rule differs from offers that credit only profit. No transfer occurs before the qualifying forecast is accepted. The credited amount cannot be paid as winnings until an interactive stake of at least RUB 500 has been made.

Earlier active bonuses block use of this bonus until they are completed or cancelled, while its own deadline continues to run. The coupons are not money, property, currency, electronic money or an unconditional cash claim. They cannot be gifted, inherited or transferred; alternative compensation, recalculation or use cannot be demanded.
