Galaxsys: company, complete observed catalogue and product scope

Tower Rush India | https://towerrushindi.com/en/galaxsys/

Company and integration profile

In the saved company materials, Galaxsys describes a studio of fast-paced games with a portfolio covering slots, instant games, crash, mines, skill and plinko. Its published snapshot claims are 60+ games in one integration, 100% Provable Fairness, 170+ currencies and 3,000+ brands worldwide. These are the provider’s dated statements, not newly measured totals.

The integration offer combines a varied portfolio, promotional tools, branding, languages, currency configuration and account support. The stated values include transparency, fairness, straightforward integration, communication, exchange of ideas and partner support. FreeBet and FreeAmount provide operator-conditioned rewards; their existence does not establish a cash entitlement in every game.

The Provable Fairness panel describes high-grade RNG for randomness. The RNG and an independently reproducible checking algorithm are different characteristics. A portfolio-wide marketing statement is not a substitute for the exact original-game version and verification inputs.
