Withdrawal requests, fees and timing

Tower Rush India | https://towerrushindi.com/en/withdrawal/

External withdrawal is not game Cashout

Each WD request uses the operator record's UPI, Visa debit or USDT/TRC20 method. Both game and payment accounts are Indian in these episodes. Request and receipt keep the wallet currency: INR, USD, EUR or USDT. An INR display equivalent is not an asset received. Return is to the own deposit method; changed details require proof of ownership. Each CASH record uses one deposit method, so no multi-method allocation is inferred.

Limits and preconditions

Field	Recorded profile
Minimum	Crorebet UPI 500 INR; Stake 2.5 USDT; MyStake 10 USD; Betify 10 EUR; other INR minima belong to the individual operator card.
Per request	100,000 INR or 2,000 USD/EUR/USDT.
Per day	150,000 INR or 5,000 USD/EUR/USDT per calendar day IST.
Per week	500,000 INR or 15,000 currency units per seven calendar days.
Per month	1,500,000 INR or 50,000 currency units per calendar month.
Prior usage	Zero before the first WD; the remaining allowance after it is recorded individually.
Concurrent requests	One active request.
Ordinary deposit turnover	1× deposit: five accepted stakes total D; this is separate from bonus rollover.
Round state	All five rounds settled; pending=0.
Welcome	Disabled in CASH; the separate WELCOME episode does not block it.
KYC	Registration, first/second withdrawal and changed-details checks remain operator-specific.

Confirmation, review and transit

SMS, email or an authenticator confirms the particular account's WD. An SMS route is not inferred when the record specifies email/authenticator; a banking PIN is not a casino-login credential. Review is the interval before sending. Sent time equals request time plus review; receipt time adds transit. These episode intervals are calendar intervals; banking terms expressed in working days keep that separate basis. Exact request, sending and arrival times are preserved in the WD sections of E01–E10.

Before sending, cancellation releases a reserve and does not create profit. After sending, history and the existing-operation enquiry are the relevant record. A cancelled Betclic form before confirmation/reservation created no money movement; only final WD-BETCLIC did so.

Every recorded fee basis

Item	Treatment
Deposit	0% operator fee in the selected episodes.
4RABET / Betclic WD	0.5% of the requested amount; no separate cap within the request limit.
Stake WD	Fixed 1 USDT, counted once within the withdrawal request.
Other selected withdrawals	Zero operator fee.
External payment/bank/intermediary	Zero extra charge beyond the recorded fee.
Balance debit	W, not W plus another fee.
Receipt	W−fee in the same currency.
Conversion	1 sending unit = 1 received unit; exchange basis fixed at request creation because no operation conversion occurs.
Stake example	8−1=7 USDT.
4RABET example	350−1.75=348.25 INR.
Betclic example	600−3=597 INR.

The percentage fee belongs to the operator; the fixed crypto fee is the published cashier withdrawal charge. No additional bank fee is added to the USDT record. The recipient total matches the received column. A separate INR display rate is not applied to the cash ledger.
