The publisher, the author and their separate roles

Tower Rush India • https://towerrushindi.com/en/about/

An independent editorial project

Tower Rush India is the editorial publisher of towerrushindi.com. It is a reference project about the original Tower Rush by Galaxsys. It does not accept bets or maintain casino wallets. Neither Galaxsys nor any casino operator is the publisher of this editorial website.

Karthikeyan Sengupta

Karthikeyan Sengupta is the author and analyst responsible for the reported episodes. His professional field covers iGaming, betting, gambling products and payment systems, with seven years of experience. Authorship does not make him the casino's legal operator or its responsible officer.

Language, location and product identity

The main language version is Hindi for India (hi-IN). The English and Russian editorial versions are international, language-only versions. An en-IN casino interface in an operator episode belongs to that casino's Indian interface and does not change the international status of the English editorial site. The reported account country, currency and payment channel remain attached to each episode.

Tower Rush 2, Tower Rush Branded and Dragon Tower are separate products. Original Tower Rush, Galaxsys, the relevant version and the individual Build/Cashout round identify the subject of this reference. International Melbet and Russian Мелбет have separate scopes; the recorded 1w material is also distinguished from the 1Win India profile.

Ownership and contact

Rights in original editorial text remain with their rights holder. Tower Rush, Galaxsys and casino brands remain the designations of their respective rights holders. Editorial use of a name or logo does not transfer ownership to the publisher and does not confer official status.

The editorial contact is editorial@towerrushindi.com. Editorial corrections and data enquiries belong to the publisher. Account, payment, identity-verification and withdrawal matters belong to the relevant operator. The audience is 18+; an editorial age notice does not replace the operator's documentary KYC.
